

Raspberry Pi GPIO Tall Header - 2x20

PRT-14017

Description: This 2x20 "tall" header has the same number and spacing of pins as a Raspberry Pi and provides your board with the ability to extend the heights of your GPIO to accommodate for enclosures or other parts that can encapsulate your Pi. This through-hole header has 40 0.1"-spaced pins and can just be snapped into place with minimal soldering to an applicable "shield."
